

Child Care Provider Expo Keynote Speaker

Lakeshia Yancey, Family Support Specialist with PEATC

Lakeshia Yancey has extensive experience serving children and families from diverse backgrounds, particularly in the early childhood field as a former preschool teacher for Head Start and in the private sector. She is very passionate about child development and effective classroom integration. She believes that if educators meet children and their families where they are, they will improve their educational outcomes.

As a result of this expo, participants will be able to look at how behavior influences young children and understanding how it is addressed in IDEA 2004. You will become familiar with the ABCs (Antecedent, Behavior & Consequence) of all behavior supports and behavior management. Functional Behavioral Assessments will be covered, and you will have an opportunity to practice using a FBA tool to assess behavior.
